

Mansueto Library

The Joe and Rika Mansueto Library features the most modern and innovative reading room on campus, as its distinctive UV blocking panels that make up the large dome allow students to study while basking in the sun or appreciating a light snowfall. Beneath the reading room is a massive storage space that holds up to 3.5 million volumes, all of which are retrieved completely automatically using a system of robotic cranes.

INSTRUCTIONS

- Cut out the all images on both pages along outside edges. Also cut along every small solid white line

✂ Make cuts first. Use an X-Acto knife for precision.

- Fold paper on white dashed lines.

📏 Use a ruler or another straightedge to assist in folding flaps

- Fit the cut-out shapes from this page into the notches cut out from the other page

Fold Line
